

How-To: Create Unlimited Backlinks On Autopilot Via IFTTT - IFTTT Backlink Commando Review

"Put the internet to work for you." is IFTTT's slogan and exactly what every internet marketers' goal is...

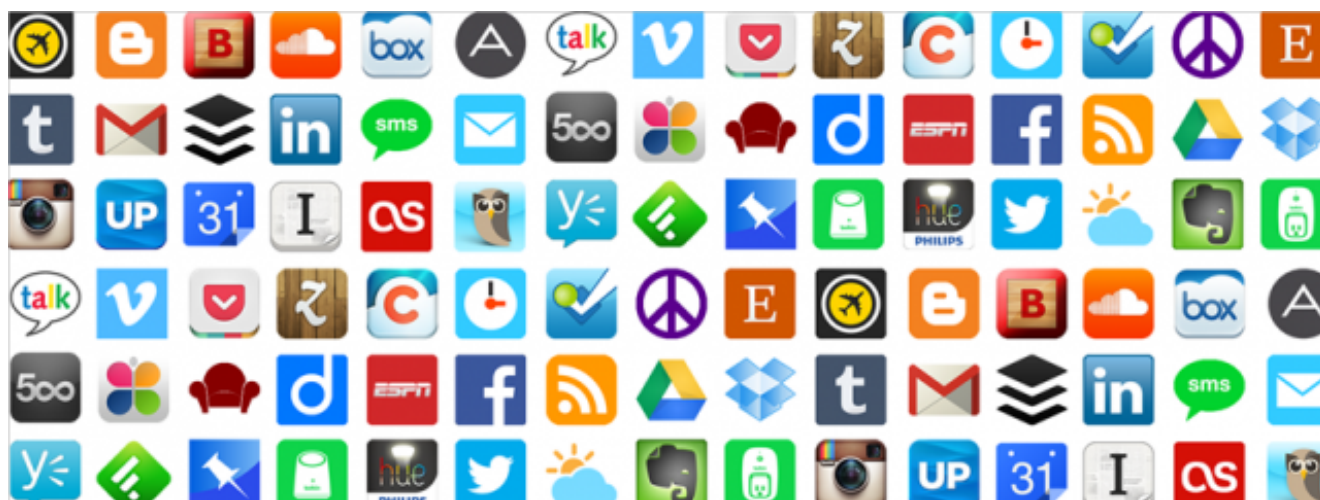

If you still haven't stumbled across the web app called [IFTTT](#) (which stands for If This, Then That) than let me tell you, it's definitely worth checking it out!

Take advantage of the IFTTT features as most internet marketers are still not using the free service to it's full potential!

Did you know you can set up IFTTT to automatically create virtually unlimited free backlinks to your website, landingpage, video, etc?

In this tutorial you will learn:

- What is IFTTT?
- What is a IFTTT recipe?
- How do I create a IFTTT recipe?
- How do I create unlimited backlinks on autopilot via IFTTT?

What is IFTTT?

IFTTT .com (stands for If This, Then That) is a web application that connects different web apps or services and communicates with them to complete a predefined task.

Every web app that IFTTT can communicate with is referred to as a **channel** and has its own dedicated landingpage explaining you how an automation process can be **triggered** and what **action** can be taken.

EXAMPLES: forwarding (certain) emails, uploading notes to Evernote, sending a welcome message to new fb group members, saving new contacts in a spreadsheet, save Instagram photos to Dropbox and so much more...

What is a IFTTT recipe?

You can create a new automated process with a couple of mouse clicks. IFTTT calls it a **recipe**. The basic concept is simple: You define when/how your recipe will be triggered and what action will be taken.

How do I create a IFTTT recipe?

1. IF THIS = Define a trigger (example: **IF** a new article has been published on nytimes.com)
2. THAN THAT = Define the action (example: **THEN** share it to my Facebook wall)

There are numerous *recipes* you can create, here are some more examples:

- Auto update Twitter profile image when you set a new profile image on Facebook (or the

other way around)

- Schedule daily auto posts of images or files (from a specific source/url) to your social media account.
- When receiving an Email from person A, forward and/or text the message to person B

The possibilities are endless as they currently support 160 apps (see entire list [here](#)) and new web apps are constantly being added.

Public IFTTT Recipes - Recipe Inspiration

If you are new to IFTTT or if you're already using IFTTT successfully, checking out the [public recipes](#) is a great way to get some inspiration on how you can use IFTTT for your business.

TIP: You can also share your own recipes publicly! I'm sure you'll be surprised by how many people will be using your recipes to promote your website, service, product or cause for free. (Decent content is mandatory)

IFTTT Professional Marketing Tool - IFTTT Backlink Commando Review
