

Healzer PinBot Review

[Healzer PinBot](#) is a automation software for Pinterest. It lets you easily dominate your competition on Pinterest...

Healzer PinBot Review

Pinterest is becoming more and more interesting for marketers and entrepreneurs alike. No wonder as their community has been growing over the past few years and Pinterest has become a major source of free targeted traffic.

To get the most out of your Pinterest account it is very helpful to have an automation tool that can take care of the most time consuming tasks that come along managing such a social media account.

The [Healzer PinBot](#) takes care of every aspect (see complete feature list below) to create a successful Pinterest profile to promote your business. The cool thing is, it is very easy to use and they have a [free trial](#) for you to check out.

Here is a complete list of the main Healzer PinBot features:

- **Proxy support** - The most important feature of an automation tool should be the use of proxies. And even more importantly, having many quality accounts. PinBot allows you to run unlimited instances on a machine, thus unlimited amount of accounts. You can use three accounts per proxy without getting banned by Pinterest.
- **Scrape** unique and niche relevant images. This puts them into a queue which will then

be used for upload. The scrape feature allows you to fully ColorCorrect and edit your images. You can place custom watermarks on your images, add texts, crop and resize them! Do note that this feature is categorized as "manual mode", while in the "autopilot mode", PinBot will automatically scrape and pin images.

- **Manual mode:** Pin everything you have scraped. Simply hit the "start" button.
- **Scheduled mode:** Same functionality as manual mode, however it will start pinning on certain time/date.
- **Autopilot** mode will automatically Scrape and Pin query/niche relevant pins to your selected boards. Simply type in all queries/categories for each board and PinBot will do its thing.
- **Repin** niche relevant pins onto your boards. It's easy as one, two, three. In the manual mode you'll have to "Keep"/"Skip" the pins. While in autopilot the PinBot's algorithm will do that. Just select your boards and write all the queries/categories to search in for pins.
- **Like** niche relevant pins from other users. Even simpler, just type in all niches you are targeting and hit "start".
- **Create and invite** to your Group Boards. This will invite all your board's followers to also pin on your boards. Let other people do all the hard work for you, focus on creating new accounts instead! Select all boards and it will attempt to invite all followers onto that board.
- **Follow** Pinterest users and get follow backs. The settings and internal algorithm provide quality guarantee users. Filter out all the non-legit users, bots and selfish users!
- **Unfollow** Pinterest users that don't meet certain criteria. This helps you build up an authority account. The more legit your account looks, the more people are going to like and follow you.

Healzer PinBot Pricing Plan

PinBot [Premium Discount \\$299 \\$159](#). The PinBot comes with a lifetimes license. There is NO membership program. Bug fixes and minor upgrades are 100% free.

The license is valid for a single PC and you can transfer the license to another machine free once a month! If you decide to purchase but for some reason do not like the product, there is a 30-day money back guarantee.

Healzer PinBot System Requirements

PinBot is a Windows software and works on Windows Vista, Windows 7 and Windows 8 as well as Windows Server 2008 and 2012 on both 32 and 64 Bit. Recommended at least 512mb RAM, Single Core CPU and good internet connection.

To be able to run PinBot on a Mac you can either use software like Parallels to emulate a Windows OS or even better use a VPS service (*Virtual-Private-Server* - basically a Windows machine in the cloud).

Tip: Run PinBot on a VPS and save your computers resources. I can recommend

[cheapwindowsvps](#). Also for Mac users!

Healzer PinBot Alternatives

Check out the [NinjaPinner](#).

Healzer PinBot Free Alternative

Unfortunately there is no free alternative that comes close to what the PinBot can do. Why not try the [free PinBot trial](#)?

Pro vs. Contra

[box type="success" align="aligncenter"]

Pro

- lifetime license
- free updates
- multiple accounts
- 3 proxies-per-account feature[/box][[box type="error" align="aligncenter"]

Contra

- single machine license (1 machine transfer per month included)
- no Mac OSX support

Tip: Both problems can be solved using a VPS. I recommend [CheapWindowsVPS](#).[/box][[box type="note" align="aligncenter"]
