

WordAi Review - Automatically Rewrite Content

[WordAi](#) is a automatic spinning tool that will rewrite entire sentences and paragraphs.

It was created by Alex Cardinell back in 2011. It is designed for people who own small (tech based) businesses, or are self employed.

A majority of their clients are companies that are owned by one or two people (and have no employees). The spin tool supports English, Spanish, French, and Italian and is one of the most talked about spinning tools over the last couple years. There is a full featured [free 3-day trial](#) available.

The automatic spinning features of WordAi are outstanding but the tool does have its limitations when it comes to altering the spintax by hand. Content will generally maintain a high quality but there are times when it looks spun and the content needs manual editing. This is were [other spinners](#) come in.

WordAi may be the best auto article rewriter available today. But spinning and already published article and expecting it to be readable and unique is in most cases still a step too far currently. But it all depends on the content of your source. If WordAi "understands" it then the tool can produce some pretty impressive output. Check the following video to WordAi in action.

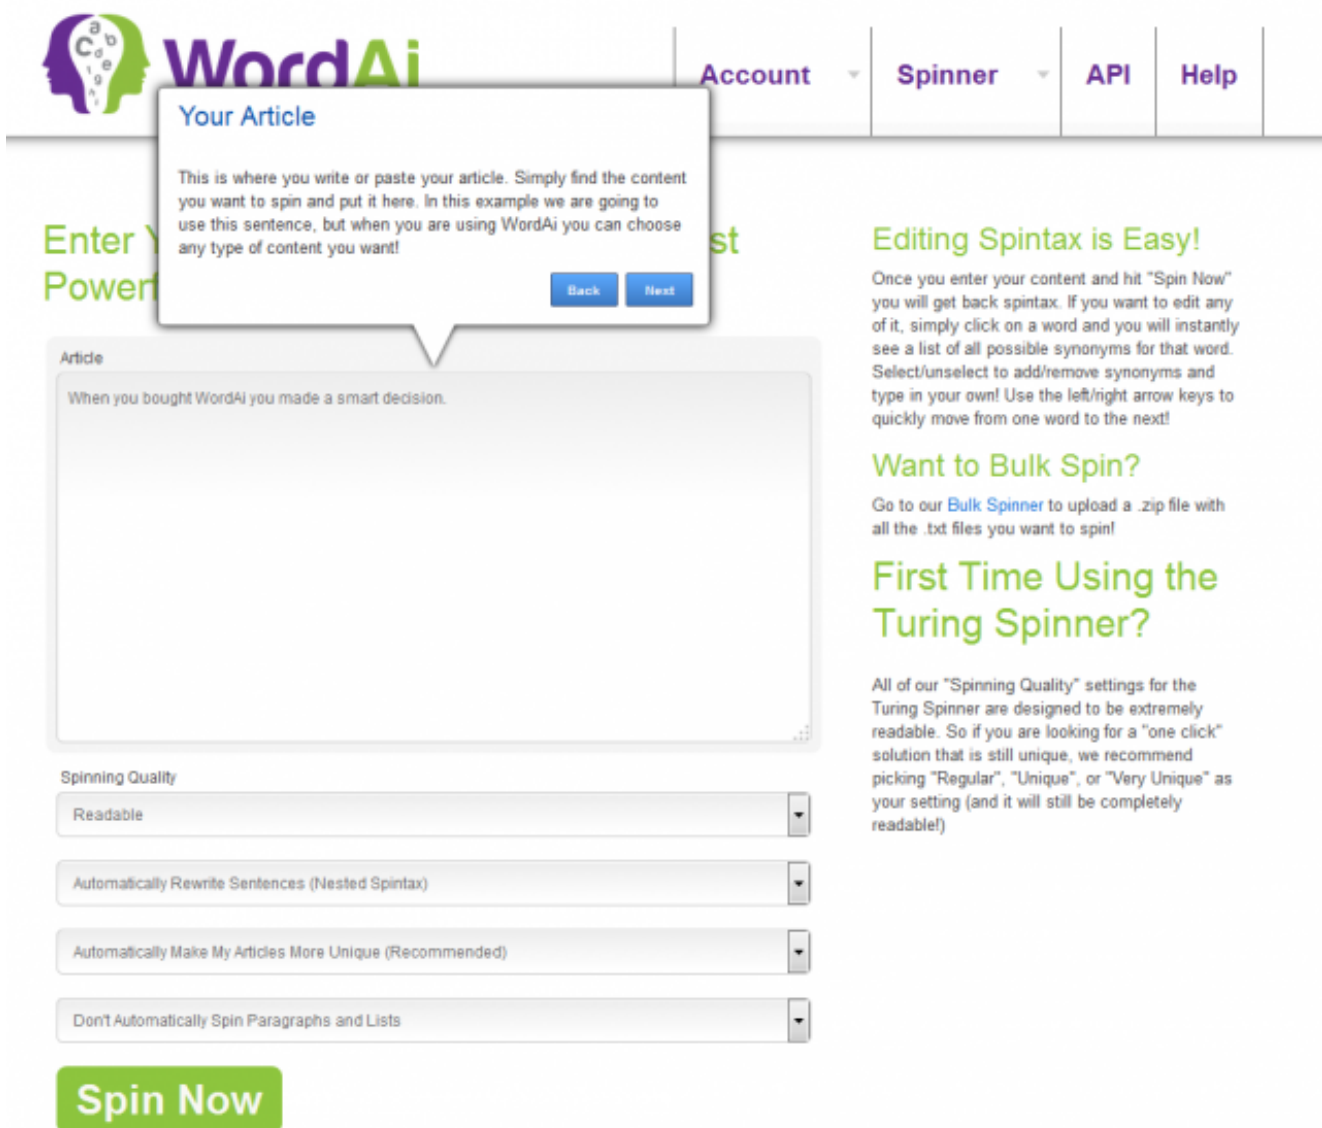

[leadplayer_vid id="53BF39AE5FDDA"]

Wordai is able to tell the subtle differences between words and makes sure each and every synonym that it picks makes complete sense.

Cool thing is that the structure of sentences and paragraphs are completely rearranged while still keeping their meaning. But of course WordAi can do synonyms spinning as well.

So just give it an article and get nested spintax.

It's a great tool and the first choice to many marketers for their tier 1 sites.

The screenshot shows the WordAi website interface. At the top left is the WordAi logo, which consists of two stylized human heads in profile, one purple and one green, facing each other. Inside the heads are various letters (a, b, c, d, e, f, g, h, i). To the right of the logo is the text "WordAi". In the top right corner, there are navigation links: "Account", "Spinner", "API", and "Help". Below the navigation links is a "Your Article" dialog box with the text: "This is where you write or paste your article. Simply find the content you want to spin and put it here. In this example we are going to use this sentence, but when you are using WordAi you can choose any type of content you want!" and "Back" and "Next" buttons. Below the dialog box is a text area labeled "Article" containing the text: "When you bought WordAi you made a smart decision." Below the text area are four dropdown menus for "Spinning Quality": "Readable", "Automatically Rewrite Sentences (Nested Spintax)", "Automatically Make My Articles More Unique (Recommended)", and "Don't Automatically Spin Paragraphs and Lists". At the bottom of the interface is a large green button labeled "Spin Now".

WordAi Features

Their **web based editor** gives you fast and easy access to the spin tool.

In the mask to enter your article you have the option to choose the **spinning quality**, also if you'd like to add **spintax**. Then you have the option to have WordAi help you make the article more unique. Another option you have is to **disable the spinning paragraphs and lists option**.

If you have lots of articles prepared then can also use the **WordAi Bulk Spinner** to upload a .zip file with all .txt files you want WordAi to spin for you.

The **WordAi API** is used by many [content creation tools](#). All you have to do is enter your WordAi credentials into the content creation tool and it will rewrite/spin articles with the WordAi techniques.

Here is an overview of the WordAi functions. *Try the WordAi completely risk [free 3-day trial](#) before spending any money!*

- WordAi not only understands what each word means, but also how each word interacts with each other
- WordAi looks for ways to rewrite the article based on what the article actually means
- Complete sentence rewrite - WordAi tries to completely rewrite sentences so they is nothing in common with the original.
- Unique articles which can't be detected by Google as spun content!
